

FIRESURE® FIRE PROTECTION
FOR LIGHTING

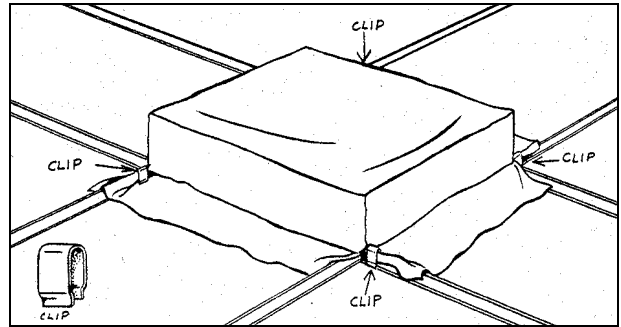

Luminaire Covers – 60/50 Contract Range

Tested to BS476 Pt 22

A range of fire rated luminaire covers which are manufactured in various sizes.

Features

Used in installations to maintain the integrity of fire rated ceilings where Luminaire fittings are installed. The cover is made from fire rated material with encapsulated intumescent which, in the event of a fire, prevents fire from spreading from the room below.

When installed above the light fitting the construction of the cover will maintain the fire and insulation attributes of the ceiling where previously tested.

Fixing Clips allow easy fitting.

Covered by failure to perform insurance, (subject to correct installation).

Key Features

- Suitable for up to 50 minute integrity and 50 minutes insulation fire rated ceilings.
- Luminaire covers are flexible, light and can be installed from below or above the ceiling.
- Self-supporting. No screws or additional fixing's required.
- No maintenance required.
- Non-toxic and unaffected by moisture.
- Fire Resistance test in accordance with BS 476: part 21.

Available in 650x625mm and 1250x625mm

Now also available in 70mm and 40mm heights for use with low profile LED luminaire fittings.

Health and safety

Luminaire covers present no known hazards during or after installation.
