PREFORMED MOULDED SOCKET BOXES

Data Sheet 10001/C

Description

The Firesure™ Socket inserts is made from Fire Resistant Fibre and is used within socket and switch boxes that are fitted into plasterboard, brick or blockwork. The Inserts are easy to install with no screws or assembly required. Make a small tight fitting hole through the insert for the cable to pass through the insert. Then fit insert into socket box and fit cover as normal with screws passing through the insert material. The flange of the insert must be on the outside front face of the socket box.
Available in two sizes and depths
The FPC range of Firesure® is probably the only range backed by **Failure to perform insurance called Efficacy insurance (or 'failure to perform' cover) protects you against the legal liability for injury to third parties, or damage to third party property, when a product or service you supply fails to perform its intended function subject to being fitted all in accordance with specified installation details and within the tested scope of application. Covered up to £10,000,000.00 .**
