FIRE PILLOW Fire Rated range

[DATA SHEET 10201](#)

Description

The **FIRESURE®** Pillow Range is a range of different sized coated glass cloth bags filled with a blend of durable intumescent and inert fillers removable but offer full fire compartmentation, offering solutions to two main areas where the product needs to be used. They are designed to be installed around services that are penetrating fire resistant walls to provide either a temporary or permanent fire seal of up to 120 minutes for FPC/SGP and up to 240 minutes for FPC/TRP. The two types are for cables and pipes through wall apertures and secondly for use in trunking where it penetrates a wall .

The FPC range of **FIRESURE®** is probably the only range backed by **Failure to perform insurance** called **Efficacy insurance (or 'failure to perform' cover)** protects you against the legal liability for injury to third parties, or damage to third party property, when a product or service you supply fails to perform its intended function subject to being fitted all in accordance with specified installation details and within the tested scope of application. Covered up to £10,000,000.00 .

Features and Benefits

Typical applications

Type; FPC/SGP are for sealing around services in complex penetrations in medium to large openings in fire resisting flexible and masonry walls made to be flexible.

Type; FPC/TRP are for sealing inside metal trunking when passing through fire resisting flexible and masonry walls meeting 18th edition IET regulations made more square.

Independently tested to EN 1366-3: 2009 providing up to two hours fire resistance with Fire Classification to EN 13501-2

Dry system: no requirement for sealants, coatings, etc.

Non-toxic, low smoke, mould-resistant halogen-free, zero VOC

Pillows are self supporting and are friction fitted by compression and stacking or in trunking loose laid to fill min 70% of area to allow for cables. (if cables fill more than 50% of trunking then product SA/IFSU must be used)

Can be used in areas max temp 90°C and below 0°C

FPC/STP Mechanical & durability testing EAD 350454-00-1104

A wide range of sizes are available to suit most applications

Cost effective and flexible fitting and reusable product range

Trunking pillows are for metal solid sided trunking and plastic were fitted through a solid wall only if plastic through a partition then UFS SLEEVES MUST BE USED

Will last lifetime of ceiling without performance failure undamaged
